Professional Summary

Software Engineer with 2+ years building scalable multi-tenant systems and AI/ML production pipelines. Specialized in RAG architectures, cloud infrastructure (AWS/GCP), and DevOps automation. Track record of reducing deployment time by 60% and API latency by 40% through system optimization and multi-layer caching strategies.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, Bash

Frontend: React.js, Next.js, SvelteKit, Tailwind CSS, Material-UI, Puppeteer

Backend: Node.js, Express.js, FastAPI, Django, RESTful APIs, GraphQL, Microservices

AI/ML Stack: LangChain, LangGraph, RAG Pipelines, Hugging Face, OpenAI APIs, MCP, DSPy

Databases: PostgreSQL, MongoDB, Redis, Weaviate (Vector DB), Firebase

DevOps & Cloud: AWS (EC2, S3, Lambda, ECS), GCP (Cloud Run, Cloud Functions), Docker, Kubernetes, Terraform, GitHub Actions, Nginx, Celery, RabbitMQ

Observability: Prometheus, Grafana, Langfuse, ELK Stack, Distributed Tracing

Experience

Nervesparks Pvt. Ltd.

Software Engineer

New Delhi, India

Nov 2024 – Present

- Architected CI/CD pipelines with Jenkins and GitHub Actions, reducing deployment time by 60%
- Implemented Terraform IaC for multi-cloud deployments (AWS, GCP, Azure) with Nginx load balancing for 10+ microservices
- Designed hierarchical RBAC system using Google Identity Platform with 4-tier access control (Platform → Organisation → Department → Users)
- Optimized database queries reducing P95 latency by 40% through indexing strategies and query profiling
- Implemented multi-layer caching (L1: In-memory, L2: Redis, L3: CDN) achieving 85% cache hit ratio
- Developed enterprise RAG services with LangChain and Weaviate, serving multiple client applications
- Built MCP servers for tool integration and AI agent orchestration using LangGraph
- Deployed 15+ FastAPI microservices to Google Cloud Run with auto-scaling and cold start optimizations
- Engineered meeting bot automation using Puppeteer for Google Meet, Teams, and Zoom with real-time audio capture
- Established observability stack with Prometheus, Grafana, and Langfuse, reducing MTTR by 50%

Manav Rachna University

Web Developer Intern

Faridabad, Haryana

Aug 2024 – Oct 2024

- Designed and developed Student Welfare Department website, centralizing information access for 5,000+ students and faculty
- Built real-time feedback modules enabling streamlined student-teacher interaction and communication

- Contributed to HRV biomedical research project under Dean supervision, assisting in data analysis and visualization

Projects

Enterprise RAG Platform

FastAPI, LangChain, Weaviate, PostgreSQL, Docker, Langfuse

- Built centralized RAG service with multi-provider API key management and configurable endpoints
- Implemented evaluation methodologies for retrieval quality achieving 92% accuracy on test datasets

AI-Powered Document Processing System

Python, LangChain, DSPy, ChromaDB, FastAPI

- Developed modular pipeline supporting PDF, DOCX, and image extraction with semantic chunking
- Integrated DSPy for optimized RAG with automatic prompt tuning, improving response relevance by 35%

Imaginfy – AI Image Generation Platform

React, Node.js, MongoDB, Redis, Hugging Face, Stripe

- Built text-to-image platform using Stable Diffusion with credit-based Stripe monetization
- Implemented Redis caching and concurrent request handling for high-throughput generation

Intelligent Job Application Tracker

MERN Stack, OpenAI APIs, PostgreSQL, Serverless

- Created job tracking system with LLM-based resume analysis and improvement suggestions
- Built pattern recognition to help users refine profiles based on application success metrics

Education

Manav Rachna International University
Master of Computer Application; GPA: 8.1

Faridabad, Haryana
July 2023 – June 2025

Maharshi Dayanand University
Bachelor of Computer Application; GPA: 7.2

Rohtak, Haryana
July 2020 – May 2023
